Version rollout, base	10,000	10,000 =

5 · WHAT A MONTHLY REVIEW ACTUALLY COSTS measured on the sweep of 29 August 2026

Only 88 answers needed a human ruling and 153 needed a link or page repair. The rest were confirmed against their official page with no human time at all. That is 10.4 person-days a month against 19.7 if the same obligation were met by reading every record by hand.

6 · THE MONTHLY FEE AGAINST THE COST OF THE OBLIGATION

The quotation sits 18% below the manual cost of the same obligation, and also carries hosting, daily backup with 1 hour RTO, and external monitoring.

7 · MODEL COST measured on the live system, not estimated

ITEM	VOLUME	COST USD
Input: 25-field schema plus route facts, at \$1.90 / 1M	1,895 tok	\$0.0036
Output: the completed 25-field answer, at \$8.00 / 1M	877 tok	\$0.0070
One route decision		\$0.0106
Monthly re-check of every cached answer (\$4.3)	702 × \$0.0325	\$23
Cold-miss decisions, 50,000 queries a month at 90% served warm	5,000 × \$0.0106	\$53
Translation deltas, 39,609 entries already cached		\$11
Model spend		\$87 / month

Measured from the running system: a 6,418-character schema, 214 characters of route facts and a 3,068-character answer, at the 3.5 characters per token the provider documents. Compute is a rounding error next to verification. The monthly fee is people reading official pages.
