

Care and Materials

Guide for washing, drying, and ironing

Wash and Dry

Machine wash cold

Wash dark colors separately

Wash inside out

Do not bleach

Line dry in shade

Do not tumble dry

Do not dry clean

Ironing

Warm iron on reverse

Product Facts

Material: 100% cotton

Made in China

RFC number: 910911-040

Wash and Dry

Machine wash cold
Wash dark colors separately
Wash inside out
Do not bleach
Line dry in shade
Do not tumble dry
Do not dry clean

2

Ironing

Warm iron on reverse

3

Product Facts

Material: 100% cotton
Made in China
RFC number: 910911-040

Conceptual group 1, Wash and Dry

1. **What is the concept behind this group?**
This group has the washing and drying rules the user has to follow
2. **Why is this the first group they should see?**
Most people start with washing steps first, then move to drying so putting this group at the top matches that order
3. **What important information did you emphasize?**
The core decisions are the water temperature, bleach, and drying method. "Machine wash cold," "wash colors separately" and "wash inside out" are the lines the user needs to notice first
4. **What did you choose not to emphasize?**
I kept the extra tips less prominent and not at the top, they matter but they are not the first decision the user needs to make
5. **What two visual information design tools did you use together to bring it out?**
I used location and grouping, I put it at the top and enclosed it in a clear box so it reads as the main section

Conceptual group 2, Ironing

1. **What is the concept behind this group?**
This group explains how to iron the item if the user wants to remove wrinkles
2. **Why is this the first group they should see?**
They should see it after washing and drying since ironing happens later. It also applies only if the user chooses to iron
3. **What important information did you emphasize?**
The key instruction is "warm iron on reverse." It's short and action focused so it should be easy to spot
4. **What did you choose not to emphasize?**
I did not add extra ironing details that are not on the label, the goal is quick guidance
5. **What two visual information design tools did you use together to bring it out?**
I used whitespace and a clear heading. The spacing separates it from the longer wash list, and the heading makes the purpose obvious

Conceptual group 3, Product Facts

1. **What is the concept behind this group?**
This group lists facts about the item, like material and origin, and not care steps
 2. **Why is this the first group they should see?**
They should see it last because it does not change what they do during laundry today. The care instructions matter first.
 3. **What important information did you emphasize?**
"Material: 100 percent cotton" is the most useful fact since it helps explain why the care rules focus on temperature and drying
 4. **What did you choose not to emphasize?**
I didn't treat the registration number or country of origin as highly important, those details aren't really needed when someone is just doing laundry
 5. **What two visual information design tools did you use together to bring it out?**
I used grouping and visual weight, It has its own box, but it is placed lower on the page and feels less dominant than the care steps
- I didn't use any colors because the assignment said not to! :)
