

Homework 11:

Graphic Design

Warm Up Due: Friday Apr 24, 2026 11:59 PM on Courseworks. Grace period until 8AM the following day.

Main Due: Monday Apr 27, 2026 11:59 PM on Courseworks. Bring your materials to section ready to present. No grace period--feedback will be given during class.

Warm-up:

Group

1. **Feedback.** What feedback did you get from your TA on your technical prototype?
 - What's something good about your technical prototype from HW10?
 - What are the things your TA said you still need to work on with regard to implementing a fully functional technical prototype?
2. **Job Assignments.**
 - Some group members may focus on graphic design and some may focus on continuing technical implementation. List the roles you plan to have and the names of the people assigned to them.
 - If you're a solo group, list what technical implementation you plan to do this week.

What to submit:

Group. A PDF with the warm-up answers

1. **TA feedback** on your technical prototype (what's working, what still needs work)

2. **Job assignments** (roles and names of people assigned to them; solo groups describe their own plan for the week)

Main Assignment:

In this assignment you will design the information hierarchy and color palette for the 4–5 most important types of screens. This most likely will include:

1. Home screen
2. One learning screen
3. One quiz screen
4. The final quiz screen
5. (If you have it) a screen that transitions between learning and quiz

The designs should be done in Google Slides.

What to submit:

Group. A PDF of your Google Slides file containing the graphic design for your 4–5 most important screens. This should include:

- One slide showcasing your color palette and how it's applied (base, accent, dark grey, light grey, white — and how each color is used across your screens)
- One slide showcasing graphic design using conceptual groups and other elements of visual hierarchy
- One slide showcasing how your fonts are used and where across your screens (e.g. Source Serif Pro, 16px Regular, body copy, p tag).
- A written answer to: what font(s) did you pick and why? (Is your pairing concordant or contrasting?)

Individual. A short paragraph or bullet list describing what *you* personally worked on this week for the project. Show images if they help.

Individual. A screenshot of a commit you made to the GitHub repo this week. If you're the designated graphic designer this week and didn't commit code, submit a screenshot of the Google Slides revision history showing your edits instead.

Everyone in the group must submit individually on CourseWorks. The group portions (the slides PDF, the warm-up PDF) may be identical across submissions; the individual paragraph and commit/revision screenshot must be your own.
