**JOINT DECLARATION OF JANE JIE SUN AND JOHN JIONG WU REGARDING
THEIR US\$180,000 INVESTMENT IN ELLIS IN SUPPORT OF THE O-1A PETITION**

We, Jane Jie Sun and John Jiong Wu, declare under penalty of perjury under the laws of the United States of America that the following is true and correct:

1. We submit this joint declaration in support of Sammy Bnmoraad Abdella's O-1A petition and to explain the significance of our investment in Ellis, the artificial intelligence company he founded.
2. Jane Jie Sun is the Chief Executive Officer and a member of the board of directors of Trip.com Group. Before becoming CEO in 2016, she served as Chief Financial Officer, Chief Operating Officer, and Co-President, giving her extensive experience in finance, operations, acquisitions, and scaling a global technology platform.
3. John Jiong Wu is the Founding Partner and Chairman of FengHe Group. He was an angel investor in Alibaba Group and served as its inaugural Chief Technology Officer from 2000 to 2008, after earlier engineering work at Yahoo. He has substantial experience building and investing in high-growth technology companies.
4. Our careers across the United States and Asia give us significant experience evaluating founders, technology products, scalability, and global markets. They also give us direct

insight into the importance of efficient immigration systems to international talent, founders, and companies.

5. We evaluated Ellis's product, business model, market need, and Mr. Abdella's leadership. We concluded that Ellis addresses a meaningful and underserved problem by using artificial intelligence to reduce the time, cost, and administrative burden of employment-based immigration case preparation.
6. Our investment was a genuine commercial decision, not a gift or nominal endorsement. It is documented by executed financing instruments and corresponding payment records, which identify our respective amounts and substantiate the combined total.

Together, we invested a total of US\$180,000 in Ellis.

7. Mr. Abdella's role was material to our decision. As founder, he established Ellis's vision and led its product, commercial strategy, customer development, and fundraising. We respectfully ask USCIS to consider our investment as independent commercial validation by experienced technology leaders of his work and of Ellis's potential.

Dated: _____, 2026
