

AI workspace for immigration operations

Investor deck

THE PROBLEM

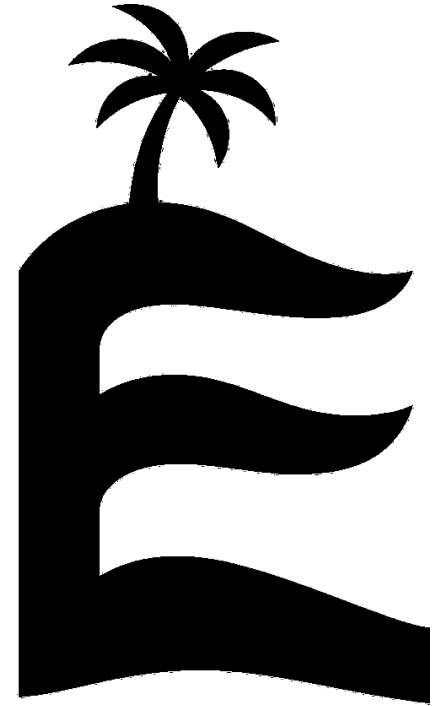

Immigration work is scattered across tools that were never built to run it.

PDFs / email / Slack / spreadsheets / portals / notices

Employers lose visibility across cases, renewals, travel, and compliance.

Employees wait for answers while critical documents live in inboxes.

Lawyers spend too much time on operational work that software can do.

**Every delay creates cost, risk,
and anxiety.**

CORE INSIGHT

Immigration is not one filing. It is a recurring operating system.

COMPLIANCE

RENEWALS

TRAVEL

RFEs

EVIDENCE

HANDOFFS

The company needs a shared source of truth. The immigrant needs instant, case-specific guidance. Counsel needs clean, attorney-ready work product.

**Ellis becomes the
workspace, system of
record, and action layer.**

PRODUCT

One shared case workspace for HR, employees, and counsel.

A single workspace replaces the informal workflow of attachments, status pings, and fragmented portals.

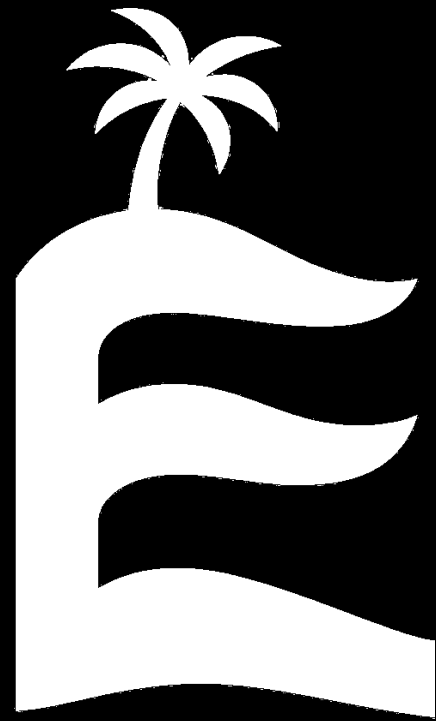

AUTOMATION LAYER

Ellis does the work around the legal decision.

Lawyers still approve filings. Ellis automates the operational layer around them.

doc review	case Q&A	risk flags
notice summaries	form prep	evidence packets

**Less inbox work.
More legal leverage.**

WEDGE

We don't replace counsel. We make counsel faster.

Employers get a real-time operating view.

Employees get case-specific answers and task clarity.

Counsel gets structured, complete, attorney-ready handoffs.

Existing counsel stays. The operating system changes.

This is the path to adoption: augment the workflow companies already have, then become the default system of record.

\$5.7B US opportunity

Bottoms-up entry market across employers, immigration firms, schools, and nonprofits.

Employers	\$4.0B	~100k orgs handling visa / work authorization workflows
Law firms	\$900M	~3k immigration firms and boutiques
Schools	\$700M	~4k SEVP-certified schools with material international populations
Nonprofits	\$80M	~1k immigration and asylum organizations

BUSINESS MODEL

Per-seat subscription plus usage-based automation.

Ellis monetizes the recurring workflow, not a one-time form.

Base platform

case workspace, roles, permissions, history

Usage layer

document review, AI Q&A, evidence generation

Enterprise add-ons

SSO, integrations, audit controls, reporting

The winner is the system of record, not the fastest form generator.

Traditional firms

Attorney-led, expensive, slow

Newer legaltech

Optimizes petitions, not the entire operating loop

HR platforms

Immigration is a side feature

Ellis

Shared workspace + agentic action layer

WHY NOW

AI agents can finally coordinate long-running regulated workflows.

- | | | |
|----|--|--|
| 01 | Models can read the messy substrate | forms, letters, passports, notices, evidence, emails |
| 02 | Workflows need persistent context | cases span months, multiple stakeholders, and changing rules |
| 03 | Enterprises are under cost pressure | legal spend can be compressed without removing attorney review |

FOUNDER-MARKET FIT

Built by someone who has lived the stakes and can ship.

Sammy Abdella, CEO

Columbia CS with AI Lab research and AI safety publication.

Production engineering at Meta and Amazon.

Deep personal context from navigating immigration under real constraints.

Full-time commitment after rejecting full-time offers to build Ellis.

Founder-led speed

MVP shipped in two weeks.
All product code written by the founder.

\$60k raised | ~\$1k monthly burn | 60-month runway

Invest in the AI operating system for immigration.

Capital accelerates product depth, compliance benchmarks, integrations, and the first core team.

Ellis AI

San Francisco / New York
