

AI workspace for immigration operations

Investor deck

THE PROBLEM

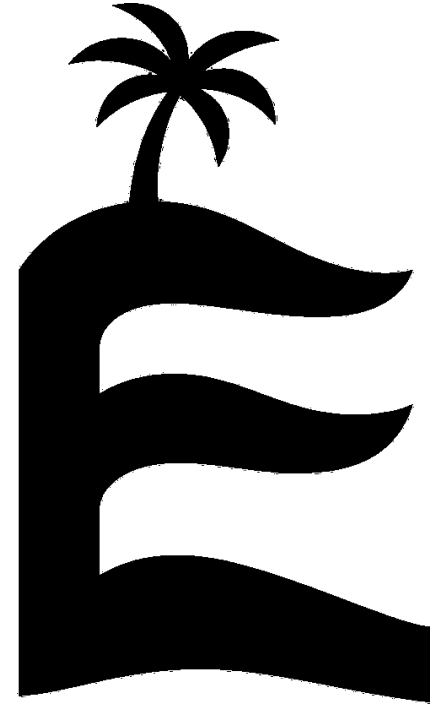

Immigration work is scattered across tools that were never built to run it.

PDFs / email / Slack / spreadsheets / portals / notices

Employers pay too much to sponsor immigrants because operations still run by hand.

Immigrants lose time and money waiting for answers, documents, and filings.

Lawyers waste hours on tasks software can automate; counsel should do final review.

Ellis cuts cost before counsel does final review.

CORE INSIGHT

Immigration is not one filing. It is a recurring operating system.

COMPLIANCE

RENEWALS

TRAVEL

RFEs

EVIDENCE

HANDOFFS

Employers need lower immigration costs and visibility. Immigrants need AI agent question assistance and managed filings. Counsel needs attorney-ready work for final review.

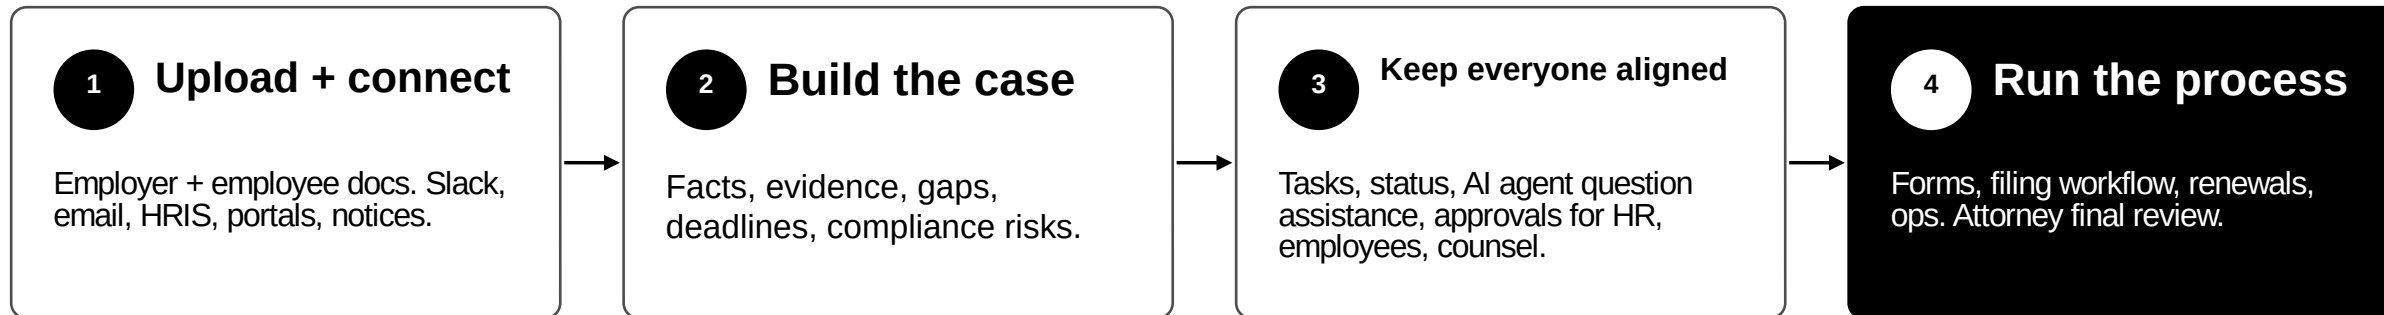

Ellis becomes the shared workspace and action layer for every case.

PRODUCT

Ellis turns scattered inputs into a managed immigration case.

Employers, employees, and counsel work from the same case truth - instead of chasing documents and status pings.

Result: fewer missing documents, fewer back-and-forth emails, and attorney-ready cases moving continuously.

AUTOMATION LAYER

Ellis does the work around the legal decision.

Lawyers still approve filings. Ellis automates the operational layer around them.

doc review

AI question help

risk flags

notice summaries

form prep

evidence packets

**Less inbox work.
More legal leverage.**

WHO BENEFITS

One workflow. Three economic winners.

Ellis removes the operational work that makes immigration slow, expensive, and confusing.

Employees

Use AI agent question assistance, know what to upload, and avoid lawyer fees for routine help.

Employers

Automate onboarding, hiring, compliance, renewals, and immigration tasks across the workforce.

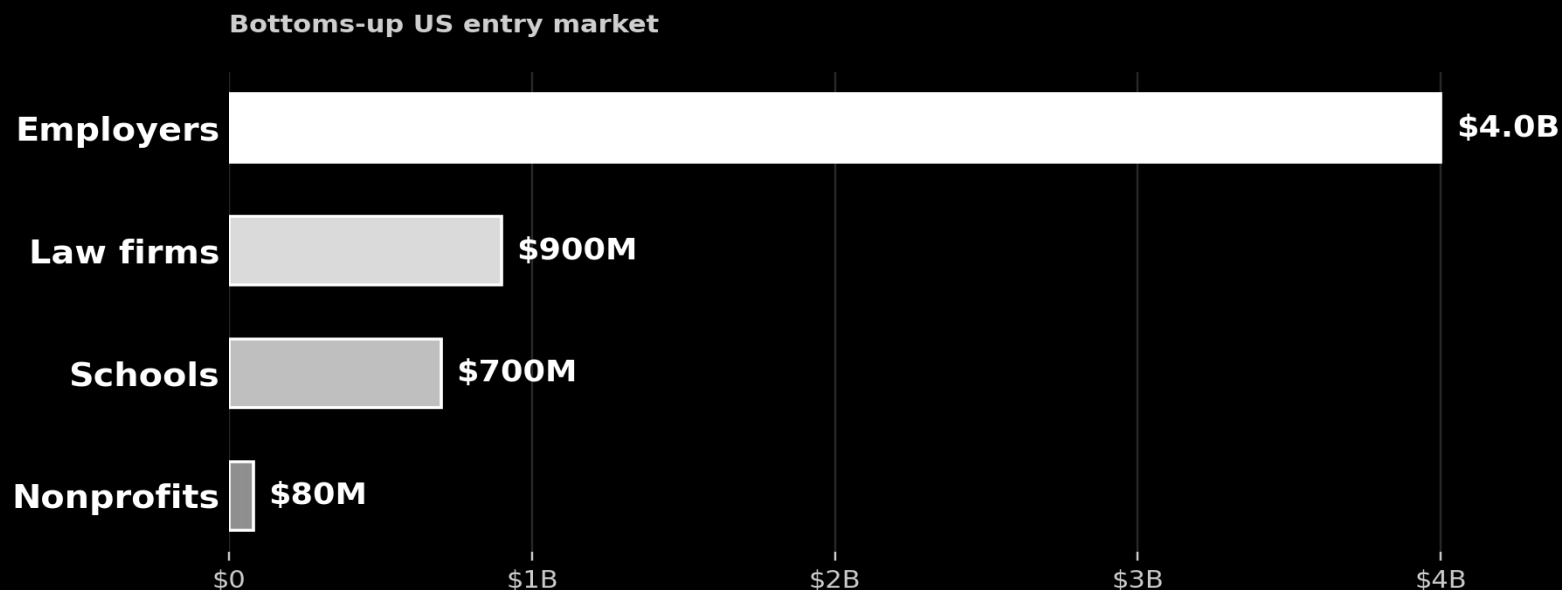

Lawyers

Receive complete, structured, attorney-ready work product and spend time on review, not inbox ops.

Lower counsel fees, faster cycles, and fewer missed obligations - without removing attorney oversight.

\$5.7B US entry market

Bottoms-up TAM across the organizations already paying to manage immigration operations.

Subscription by active managed cases.

Pricing scales with case volume across employers, law firms, schools, and nonprofits.

Land in case operations, expand into renewals, travel, compliance, and approvals - then own the immigration system of record.

The winner is the system of record, not the fastest form generator.

Traditional firms	Fragomen, BAL	Attorney-led services: high cost, slow operating cadence
Immigration legaltech	Mayflower, LegalOS	Optimizes AI petition filing - not a shared workspace or recurring ops system
HR platforms	Deel, Rippling	Immigration is a side feature inside payroll/HR
Ellis	Shared workspace + AI action layer	Runs case ops end-to-end for the employer and employees

WHY NOW

Immigration ops is ready to move from inboxes to agents.

- | | | |
|----|---|--|
| 01 | AI can read the full case file | passports, forms, notices, evidence, Slack, email, and PDFs |
| 02 | Companies need to cut legal ops cost | keep counsel for judgment; automate coordination, prep, and follow-through |
| 03 | Employees expect instant support | immigration should feel managed, not trapped in a ticket queue |

Ellis is the wedge into the system of record for every immigrant worker lifecycle.
