

a.

CourseWorks on mobile, especially when I'm trying to find one specific assignment/graded vs not graded discussion/file quickly.

b. Screenshot

c.

Recognition rather than recall

d.

It makes me remember where things are instead of just showing them. Sometimes homework is in “Discussion” instead of “Assignments” in my humanities classes so I end up clicking around because the page does not show the right thing when I need it. When I’m in a hurry, it’s annoying because it makes a simple task feel harder than it should be.
