

Sammy Abdella

sn3136@columbia.edu - 484-403-6476

EDUCATION

Columbia University in The City of New York
B.A. Computer Science

Expected 06/2027
GPA: 3.63/4.00

SKILLS

Technical: Python, C++, Java, JavaScript, SQL, HTML/CSS, Ruby, OAuth2, JWT, Docker, Kubernetes, ABAQUS, ANSYS, MATLAB, R

Languages: French, Arabic, English

EXPERIENCE

Alumni Relations and Development, Lehigh University

01/2024 - 08/2024

- Collected, analyzed, and interpreted data to enhance alumni engagement and fundraising initiatives. Managed and updated alumni databases, ensuring data accuracy and integrity

Backend Software Developer, Zitouna Bank

01/2024 – 05/2024

- Optimized RESTful APIs using Python and Django to support key banking operations and ensure seamless integration with frontend systems, reduced API response time by 30% and increased transaction throughput by 25%
- Collaborated with database administrators to manage and optimize PostgreSQL performance for high-volume financial transactions and reporting
- Worked closely with security and compliance teams to ensure backend systems adhered to financial regulations and data protection standards, ensured zero compliance issues during audits by adhering to financial regulations and data protection standards

Software Engineer, Tunisian Postal Office

04/2023 - 09/2024

- Optimized APIs for real-time parcel tracking, collaborated on refactoring the legacy codebase to a microservices architecture, improving maintainability and scalability by modularizing services using Docker and Kubernetes, and worked on implementing authentication and authorization protocols using OAuth2 and JWT, ensuring secure access to customer data and reducing unauthorized access incidents, reduced API latency by 40% and improved parcel tracking accuracy by 25% when optimizing APIs for real-time tracking

Freelance Software Developer, Fiverr

11/2023 - 05/2024

- Assisted over 50 clients in customizing web applications, developing mobile apps, integrating APIs, optimizing website performance, and implementing cybersecurity measures

Finite Element Analysis Research

11/2021 - 12/2021

- Developed custom software using C++ and ABAQUS plugins to simulate cranial bone remodeling and stress distribution after traumatic injuries
- Contributed to neuro-medical research by creating a tool to support advanced analysis, helping improve post-trauma treatment and patient care strategies. Consequently, received an invitation to the American College of Physicians as a Peer Reviewer for the academic journal Annals of Internal Medicine, the most cited general internal medicine journal and one of the most influential journals in the world. Received an honorary mention on [their 2021 issue](#)

Operations Assistant, Columbia University Housing

01/2025 - Present

- Coordinate daily housing operations, drafted clear shift briefings, gathered and relayed student feedback, and supported policy compliance through periodic room inspections

AFFILIATION

Columbia University African Students Association
